

Monitor Mounting Bracket / Instrumentation

Monitors sold separately.

The monitor mounting bracket lifts monitors up off the desk where they are easier to see while freeing up valuable workspace. The bracket is available in either desk or wall mount options. The mounting bracket can be used in either single or dual-display configurations. Create this dual-display configuration (shown above) by adding two 20 in. (508 mm) flat panel monitors.

Monitor Mounting Bracket features include:

- Simple installation and effortless operation
- Experience productivity gains associated with adding a second display
- Free up your desktop to increase workspace
- Push your displays out of the way when not in use
- Increase viewing comfort—help reduce eye, back and neck strain
- Available in desk mount (shown above) or wall mount
- Mounting bracket extends monitors (or notebook) up to 25 in. (635 mm) for desk mount and 23 in. (584 mm) for wall mount

Everything you need to succeed
